**FULL OVERLAY** 

# General Specifications (Inset - see additional specifications on SP-17)

## 1 Interior

- Natural maple EasyClean interior
- 2 Top & Floor
  - 1/2" E-Board with a natural maple EasyClean surface
- 3 Face Frame
  - Face frame is <sup>3</sup>/<sub>4</sub>" solid wood
  - 3" Wide center stile standard on 30- 48" Wide cabinets except when butt doors (BD)
  - Butt door cabinets 24-36" Wide have no center stile; See Custom Options for Butt Door Cabinets 39" Wide and up
- 4 Side
  - 1/2" E-Board with natural maple EasyClean surface; 1/4" scribe
  - Edge banded top and bottom edges (Wall cabinets only)
  - Sides do not match cabinet face. Specify finished ends for all exposed ends. See Custom Options for the following: Finished Veneer End, Near Flush Finished Veneer End, True Flush Finished End (Opaque Only), Iron Works Gable End Panel, Door End Kit, Integrated Panel End, Working Door End, and Non-Working Door End (Inset Only)
  - See Custom Options for plywood cabinet box upgrades
- 5 Back
  - 1/4" Dura-board with natural maple EasyClean surface
- 6 Hanger Rail
  - 1/2" E-Board
- 7 I-Beam
  - 1/2" I-Beam stabilizer; base and vanity cabinets
- 8 Shelves
  - 3/4" E-Board with natural maple EasyClean surface and 1mm PVC shelf banding on front edge
  - Adjustable 1 1/4" on center
  - Standard wall cabinets have full depth shelves
  - Standard base and vanity cabinets have one half depth shelf and are drilled for both half and full depth shelves
  - See Custom Options for Full Depth Shelf
  - For Plywood Shelves see Custom Options for All Plywood Box Option
- 9 Hinges
  - Standard & Full Overlay: Blum six-way adjustable cup hinge with integrated soft close; hinge opens 110°
  - Soft close hinges not available on square corner wall or base cabinets

## 10 Drawer Box & Glides

- BVD 5/8" Birch Veneer Dovetail Drawer Box with Blum Full Extension Under Mount Glides with Soft Close
  - See Custom Options for the following:
  - MPLD 5/8<sup>°</sup> Solid Wood Dovetail Drawer Box with Blum Full Extension Under Mount Glides with Soft Close and Side to Side Adjustability
  - WALD 5/8" Solid Walnut Dovetail Drawer Box with Blum Full Extension Under Mount Glides with Soft Close and Side to Side Adjustability

## 11 Roll Out Tray

- BVD 5/8" Birch Veneer Dovetail Roll Out Tray with Full Extension Under Mount Glides with Soft Close; mounted to adjustable solid wood upright posts
- See Custom Options for the following:
- MPLD 5/8<sup>°</sup> Solid Wood Dovetail Roll Out Tray with Full Extension Under Mount Glides with Soft Close; mounted to adjustable solid wood upright posts
- WALD 5/8" Solid Walnut Dovetail Roll Out Tray with Full Extension Under Mount Glides with Soft Close; mounted to adjustable solid wood upright posts
- 12 Toe Kick
  - Recessed toe is 1/2" E-Board
  - Rough toe kick size: 3 1/2" D x 4 1/2" H
  - Matching plywood toe kick material is required
- 13 SO# Label
  - Located behind hinge plate and center of face frame. SO# is required on all calls to Customer Service and on all warranty orders

## E-Board

Engineered board constructed of wood fibers bonded together with exclusive bonding agents, which are similar to the resins used in quartz countertops.

Our E-Board is engineered to tighter tolerances for better water resistance and greater stability than most plywood products on the market.

## **Additional Notes**

- Maximum door size: 26" W x 67" H
  - Except for SL series (Serenity, Slimline & Spirit); Max door size: 24" W x 67" H
- Single door cabinets will be hinged left unless specified on order
- Standard Depths & Heights (unless stated otherwise)
  - Wall: 12" Deep
  - Base: 24" Deep / 34 1/2" High
  - Tall: 12" or 24" Deep
  - Vanity: 18" or 21" Deep / 34 1/2" High
- Tall: Fixed floor between upper and lower sections is 1/2" E-Board with natural maple EasyClean surface.

Woodland reserves the right to substitute or change specs without notice due to availability and supplier constraints.

# **Inset General Specifications**

Inset cabinetry has some special characteristics and unique specifications that are different than full or standard overlay cabinetry. It is important to take note of these differences and educate your customer, especially if they live in a region with broad variations in temperature and humidity levels.

Inset cabinetry requires both careful installation and controlled environments. Racking occurs when cabinets are forced out of square by improper installation. To prevent racking, installers must compensate for out of square floors and walls with shims so inset cabinetry will function correctly. We recommend using only experienced installers to install inset cabinetry jobs.

#### Face Frame

- Non-beaded face frame with slightly eased inside edge (+0%)
- Beaded face frame available on select door styles (+10%)
- 1/8" tolerance around doors and drawers NOTE: Changes in humidity and temperature can cause this tolerance to change. This is normal and should be expected.

#### Hinges

- Magnetic catch on all doors
  - Standard with concealed hinge (six-way adjustable cup hinge with integrated soft close and quick release feature; hinge opens 110°)
  - Soft close hinges not available on square corner wall or base cabinets

#### **Drawer Box & Glides**

- BVD 5/8" Birch Veneer Dovetail Drawer Box with Blum Full Extension Under Mount Glides with Soft Close and Side to Side Adjustability\* (free upgrade)
- See Custom Options for the following:
  - MPLD 5/8" Solid Wood Dovetail Drawer Box with Blum Full Extension Under Mount Glides with Soft Close and Side to Side Adjustability\*
  - WÁLD 5/8" Solid Walnut Dovetail Drawer Box with Blum Full Extension Under Mount Glides with Soft Close and Side to Side Adjustability\*

\*Drawer front depth adjustment brackets included. Drawers in cabinets 9-12" Wide do not have side to side adjustment

#### **Roll Out Tray**

- BVD 5/8" Birch Veneer Dovetail Roll Out Tray with Full Extension Under Mount Glides with Soft Close; mounted to adjustable solid wood upright posts
- See Custom Options for the following:

Look for INSET symbol to indicate availability.

Inset cabinetry does not react well to extreme changes in climate. Wood products will naturally expand and contract with changes in climate, which in turn can cause a cabinet's dimensions to change. This is the nature of wood products and cannot be avoided. It is imperative that inset cabinetry be stored and installed in locations where both temperature and humidity are controlled. If a customer lives in an area with extreme variations in interior temperatures and humidity, we do not recommend they select inset cabinetry.

- REQUIRED FORMS: Inset Product Awareness Agreement must be completed and submitted with order
  - MPLD 5/8" Solid Wood Dovetail Roll Out Tray with Full Extension Under Mount Glides with Soft Close; mounted to adjustable solid wood upright posts
  - WALD 5/8" Solid Walnut Dovetail Roll Out Tray with Full Extension Under Mount Glides with Soft Close; mounted to adjustable solid wood upright posts

#### **Additional Notes**

- Automatically increased to 13" Deep:
  - Wall cabinets
  - Diagonal Wall cabinets
    - 12" increases to 13", opening is 12 1/16" Wide
    - 15" increase to 16", opening is 12 1/16" Wide
  - Desktop Bookcase cabinets
  - Wall End Panels with Filler Front
  - Must specify and charge to increase depth:
    - 12" Deep Base cabinets
    - 12" Deep Tall cabinets
  - 12" Deep Tall Bookcase cabinets
- Minimum depth on cabinets with drawers or roll out trays: 18" Deep (unless otherwise stated)
- Vanity cabinets available in Adult Height only
- Standard mid-rail between upper and lower sections is 2"; exceptions include some appliance cabinets, Wall Garage Door, Wall Wine Hutch, and some furniture cabinets
- Three Door and Four Door Wall cabinets, and combined cabinets have a 2" stile between right and left sections. Most base and vanity cabinets 39" Wide and up have a 3" center stile; one exception is Drawer Base cabinets 39-48" Wide have a 2" stile
- Distressing inset face frame will feature select distressing techniques; see Distressing section for more details

Woodland reserves the right to substitute or change specs without notice due to availability and supplier constraints.

## Stain

- Sprayed Stain (+0%) Cider, Toast
- Multi-Step Stain (+10%) Charcoal, Dune, Espresso, Heather, Pewter, Sable, Weathered
- Hand-Wiped Stain (+0%) All others

We use three stain options to achieve the highest quality color and coverage. Hand-wiped stains enhance the grain of the wood and create a deep, rich color. Sprayed stains are sprayed on and not hand-wiped. This process is chosen to achieve a more consistent look on tight-grained woods like Maple. Multi-step stains are designed to show some underlying wood grain thru the pigmented color. With darker stain colors, the end grain of wood may have a slightly darker appearance. As every tree is unique, there will be much greater variation in both color and the amount of wood grain showing from door to door. Some color variation is to be expected with all stains and is part of the look of natural wood products.

 REQUIRED FORM: Specialty Finish Agreement must be completed and submitted with Multi-Step Stain order.

# Finishes

## Opaque Enamel

Our opaque enamel finish is a catalyzed conversion enamel applied in a 7-step process to achieve a multi-layer and highly durable finish. We use an enamel finish as it is considered one of the hardest in the industry. After every coat of finish, components pass through a series of hand sanding processes that both refine and enrich the overall look and feel for a truly superior final product. If distressing or glaze is selected, components receive an additional clear finish coat.

All opaque finishes are available on HDF, Maple, Rustic Alder, Oak, and Rustic Oak. Maple opaque finish has a full-coverage, smooth texture. Rustic Alder opaque finish has slightly visible natural wood grain. Opaque finishes on Oak and Rustic Oak will not completely fill open grain areas resulting in visible natural wood grain. **NOTE: An opaque finish on rustic wood will obscure all but the most pronounced rustic characteristics.** 

Changes in climate conditions cause all wood products to expand and contract. As a result, opaque finished solid wood doors will show finish breaks and/or seam lines on all solid wood joints and panels as the seasons change. This is the nature of opaque finished wood products and is not a defect in the factory finishing process. Opaque finishes are not recommended for use in high humidity environments. Customers must be educated on the normal characteristics of opaque wood finishes as they will not be considered as reasons for product replacement.

	Opaque	Opaque Rustic	Opaque Heirloom, Antique	Opaque Timeworn

#### Construction of <u>maple</u> opaque doors will change as follows:

## Standard Opaque (+12%)

Woodland's Standard opaque colors have been specially chosen to coordinate with popular home interior trends.

✓ **REQUIRED FORM:** Specialty Finish Agreement must be completed and submitted with order.

CASCADE	Alder	Cherry	Hickory	Maple	Oak	Qswo	Walnut
FO Cascade	3	3	3	3	2	7	7
SO Cascade	2	2	2	2	1		6

#### FO - Full Overlay

\*To determine door / drawer width deduct 1/2" from cabinet width of full overlay single door cabinets

#### SO - Standard Overlay

\*To determine door / drawer width deduct 2" from cabinet width of standard overlay single door cabinets

#### NOTES

- Door has vertical grain, drawer has horizontal grain
- Book matched grain alignment is not available
- Solid wood slab doors have horizontal stabilizers on door back
- Not available in Opaque finishes; use Metro HDF for Opaque

#### CONSTRUCTION

Drawer Front:	1 piece solid wood
Door Frame:	
Panel:	Solid wood slab door, 1/2" thick horizontal stabilizers on door back

#### Chart -- Door & Drawer Detail

## Dealer Code: \_\_\_\_\_ Inset Product Awareness Agreement Page \_\_\_\_\_ of \_\_\_\_\_

Woodland Cabinetry wants you to be fully satisfied with your inset cabinetry. Inset cabinetry has some special characteristics and unique specifications that are different than full or standard overlay cabinetry. It is important to take note of these differences prior to purchase.

Please read the following descriptions. After all your questions about your inset cabinetry have been answered please initial all lines and sign the agreement below.

## The difference between Inset and Standard/Full Overlay

Standard and full overlay cabinetry is much more forgiving during installation and will stand up well to changes in climate through the years. This is because standard/full overlay doors and drawer fronts overlay the cabinet face frame which allows for a greater change in the cabinet's dimensions before affecting the cabinet's functionality. Inset cabinetry by its very nature does not allow for these types of changes and requires both careful installation and controlled environments.

## Installation

Racking occurs when cabinets are forced out of square by improper installation. To prevent racking, installers must compensate for out of square floors and walls with shims so inset cabinetry will function correctly. Woodland recommends using only experienced installers to install inset cabinetry jobs.

## **Environment - Storage and Installation**

Inset cabinetry does not react well to extreme changes in climate. Wood products will naturally expand and contract with changes in climate, which in turn can cause a cabinet's dimensions to change. This is the nature of wood products and cannot be avoided. It is imperative that inset cabinetry be stored and installed in locations where both temperature and humidity are controlled. If a customer lives in an area with extreme variations in interior temperatures and humidity, we do not recommend they select inset cabinetry.

## Agreement

I have read and understand the above Inset descriptions and all characteristics have been explained to me. I understand that Inset cabinetry requires a controlled environment and careful installation. If racking occurs on my Inset cabinetry, I will not hold Woodland Cabinetry responsible if I have not met or maintained the requirements set forth in this agreement.

## **Order Agreement**

Order Date:

Customer PO #:

I have seen the custom opaque color or non-standard combination sample provided by Woodland Cabinetry labeled with Sales Order (SO#): \_\_\_\_\_\_ and give my authorization to proceed with the cabinet order using the custom color. I understand that the sample is only a representation of what my cabinets will look like. I am aware that different wood grain patterns and characteristics may be present in my cabinets. Woodland Cabinetry cannot guarantee the exact match of your sample and we stress that you will see some color variation in the finished project after installation. Please be aware that all finished product will age and change with time and exposure to sun light.

If the sample meets your color expectations, please sign below and submit with your cabinetry order.
